## About Lens Engineering

Lens Engineering Services and Supplies Limitada is supported by Integrated Management Systems (IMS) that underpins every aspect of operations. We always commit to Excellency, safety, environment and quality in all we do. Total Quality Management (TQM) is at the heart of our operations.

Lens Engineering Services and Supplies Limitada is an upcoming Engineering specialists in Engineering procurement and consulting services. Lens Engineering Services and Supplies Limitada has very experienced leadership in the field they supply from working in the mines, Heavy and light industries, Manufacturing, refineries and automotive industries. We are fully black owned company of Engineers and Technicians in the Southern Africa in this field.

## Why Lens Engineering

We have Multi Disciplined Engineering skills ranging from electrical, mechanical, electronics and automation. We have a full complement of skills, We have branches in South africa and Mozambique and always ready for any task given.

## Our Vision

To be a preferred service provider across the integrated maintenance and engineering solutions sector industries through service excellence while ensuring utmost client satisfaction.

## Our Mision

To play an integral role in the development of the economy through our participation as a home-grown solution with an overriding commitment to the realization of our country's industrial, Manufacturing petrol-chemical, mining. Automotive sector and agricultural potential through supplying high quality Mechanical, Electrical, automation and Instrumentation and Control engineering services. To set the standard in our industries for levels of performance.

## Core Values

Our Values are promoted to guide all employees of Lens Engineering Services and Supplies Limitada. These describe the company as we want it to be, and it should be reflected in all our decisions and actions. Our values should create long term benefits to shareholders, customers, employees and the communities in which we operate.

## Our Commitment

Lens Engineering Services and Supplies Limitada is proud of its reputation and integrity, and we are committed to maintain high ethical behavior in conducting our business activities. Our business conduct policy provides the basis of ethics in business and values which incorporate the Partnering Against Crime Initiative Framework and is committed to zero-tolerance towards bribery and corruption. We commit to excellency in all we do.

# What We Do

We provide comprehensive facilities, engineering, commissioning and project management services to various clients in the property and industrial market sectors.

- ▣ Engineering Procurement
- ▣ Supply Of All Engineering Spares And Parts
- ▣ Supply Of Engineering Consumables
- ▣ Supply Of Industrial Tools
- ▣ Machining Of Parts As Per Requirement
- ▣ AC & DC Drives Supply and Support
- ▣ Process Control Instruments
- ▣ Industrial Automation
- ▣ Tank Gauging
- ▣ Analytical Instruments
- ▣ Flame, Toxic and Flammable Gas Detectors
- ▣ Installation, Repair and Maintenance  
(Electrical, Electronic and Mechanics)
- ▣ Preventative Maintenance System  
Design & Support
- ▣ Water Reticulation Systems Including  
Pumping, Flow Control & Purification
- ▣ Diesel Plant Fitting  
(Maintenance and repair of diesel engines and earth moving equipment)

Engineering Material | Engineering Design

# Breakdown

- ▣ The main field of specialization has been fluid pumping and fluid flow control.
- ▣ Servicing, repairing and maintaining manual and automatic industrial valves and various instrumentation and control equipment in water, automotive, chemical and petrol chemical environments.
- ▣ We are capable of undertaking other jobs like all process measurement and control devices, electrical and instrumentation, complete from project undertaking, installation to plant maintenance including automation and troubleshooting, shut down maintenance and materials handling solutions.
- ▣ Installation and Maintenance of Level Measurement and Control, Tank Gauging using Radar, Ultrasonic, Microwave, Capacitance.
- ▣ Installation, Repair and Maintenance Preventative Maintenance System Design & Support
- ▣ Design of sampling Conditioning Systems, Install and Service different types including Water analyzers pH, Conductivity, Oxygen, Gas Chromatograph for Gas analysis, Toxic Gas detectors including LPG detectors, Environmental analyzers and many more.
- ▣ We source the analyzers and offer Consultation Services and resolve any analytical problems.
- ▣ Plant and equipment optimization.
- ▣ Preventative maintenance systems design and support.
- ▣ Downtime analysis and reduction with Root cause analysis and generation of countermeasures.
- ▣ Reliability Centered maintenance system design and support.
- ▣ Maintenance spares procurement and management.
- ▣ Minor and major installations.
- ▣ Repair and support on absolute critical equipment.
- ▣ Supply of maintenance artisans and technicians.
- ▣ AC & DC Drives Supply and Support
- ▣ Maintenance and repair of diesel engines and earth moving equipment

**We'll nail your next project,  
because nobody wants  
disappointments!**

# Safety, Health And Environment

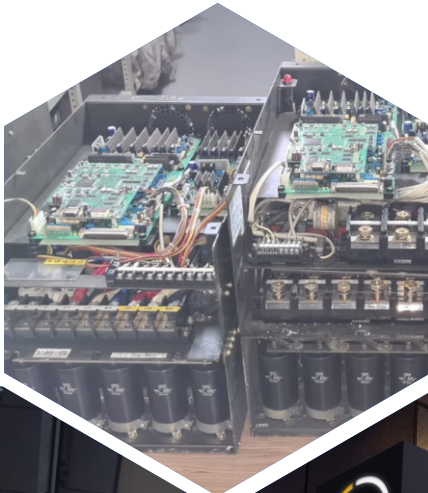

Safety is the pinnacle of our company. We deliver safe operations and zero tolerance towards any unsafe acts to strive for zero fatalities, medical treatments and lost time injuries. We protect the health and well-being of all workers and our customers during the work activities and ensure that safety is the prime consideration during execution. We prevent any spills that might cause any fire. We adhere strictly to the customer's safety regulations as stipulated in their permits with no deviations. We encourage our field supervisors to communicate any hazards they have observed to the customers.

## Special Training

Our team is trained at working at heights using scaffolding and in the use of breathing apparatus where toxic gasses are present. They are also trained on basic firefighting. Our team is trained in different specialities in engineering electrical, mechanical, electronics and automation.

## Skills Development

Our leadership is passionate about our people development as this is the key to success and gets a better quality on the job we execute. We encourage our people to self-develop and we also assist them in developing in their career. We will always send them to any relevant courses that will empower them thus benefiting our company as well as our customers. As we grow our leadership has taken a decision to bring in interns to give them training and assist our country in the shortage of skills.
